About This Game

Madness comes to us all...

From 1991-1999 a series of sounds have been detected deep within the ocean. All heard around the world, 3000 miles away from the detection center. Further away than any known creature can communicate.

Ever since, the sounds have proceeded, each year moving closer and closer to the same location. All except this year. The sounds have reached their destination and have stopped all together. It's your job to investigate...

Depths of Sanity is a Metroidvania action adventure game based on exploring the depths of the ocean. The player is tasked with investigating noises heard from the ocean that cannot be explained by scientists. As they delve deeper they begin to question their reality and their mission as a whole.
